# CONSULTING SERVICES

Here Are The Methods That Are Helping Farmers To Progress Their Cultivation Practices

Operations Consulting

Soil Fertility Management

Infrastructure Design Service

## High functioning operations are integral to the success of your cultivation plan!

**Maximize your facilities functionality and potential with streamlined and proven operations procedures.**

[Book A Consultation Now!](#)

Soilscape Solutions provides industry leading Operations Consulting to aid clients in all matters associated with their cultivation. We bring to the field decades worth of cultivation experience and our "Whole Systems Approach". The Soilscape Solutions Team is available as your professional and dependable resource when it comes to Operations and Cultivation Consulting needs.

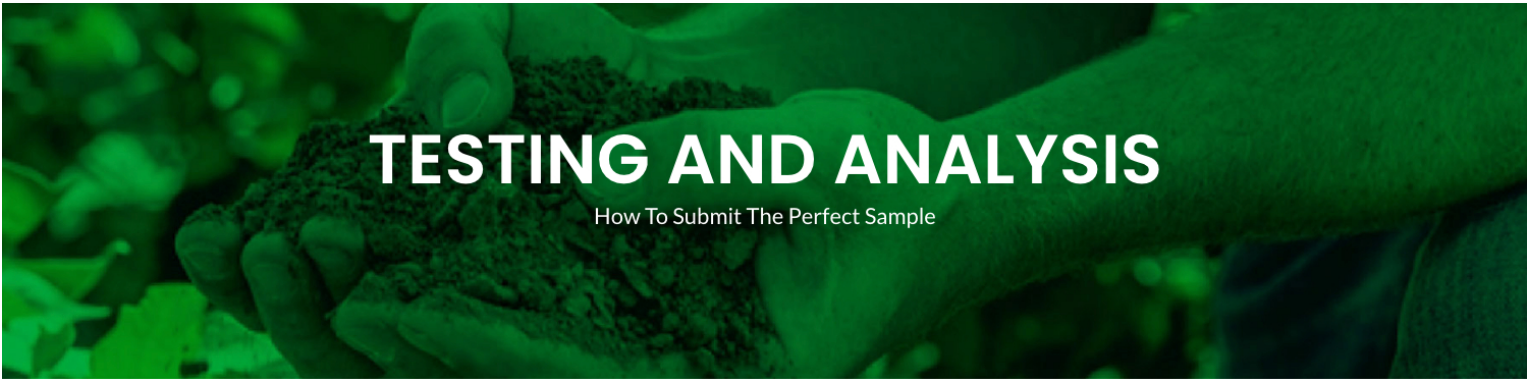

We cover all functions of your cultivation site and plan from beginning to end. Our whole systems approach begins with an in depth evaluation of your current cultivation practices, infrastructure specifications, and evaluation of your personal cultivation goals. Our Consulting Team will then formulate and outline a specialized plan for your specific operational needs. These plans will focus on improving efficiencies, reducing costs, and increasing productivity of your operation.

Key focus materials of our Operations Consulting include: Propagation, Mother Stock Timelines and Procedures, Cloning Timelines and Procedures, Transplanting Timelines and Procedures, Pruning Timeline and Procedures, Vegetative Timelines and Procedures, Flowering Timelines and Procedures, Harvesting Timelines and Procedures, Drying and Curing Timelines and Procedures, Processing Timelines and Procedures, and the Sorting and Storage of finished products. Soilscape Solutions is here to aid in all facets of your Cultivation processes, from beginning to end, from first roots to beautiful fruits, we have you covered!

# TESTING AND ANALYSIS

How To Submit The Perfect Sample

We partner with laboratories focused on precision analysis. From this data collection we create site specific solutions to analyze native agriculture soils, container growing media, water sources, and plant tissue.

### Step 1

Obtain soil sample.

### Step 2

Mail to Soilscape Solutions.

### Step 3

Receive results in 1 week!

## TESTIMONIALS

*"...helped us to identify the issues and create solutions..."*

**Kevin Murphy**  
Sequoia Soil Company

"Any farm looking to amend their existing soil or provide nutrient to crops over the growing season needs to use Soilscape Solutions products. They have the knowledge and testing services available that will educate you along the path to success."

**John Carr**  
Stanky Dank Farms

"Once I started working with Soilscape Solutions, organic farming became easy and my crop consistency was on point. Soilscape Solutions Mothership Mix is an outstanding product. I have seen excellent yields without any supplemental fertilizer. I also love the fact that Soilscape sources their products sustainably. Soilscape Solutions is community oriented, locally owned and operated family business."

**Phil O'Connor**  
Grouse Valley Farms

"At Grouse Valley Farms we have been reusing our soil for over a decade, so regular soil testing and a proper fertility management program is essential to our success. Soilscape Solutions is our number one trusted source for soil testing and soil amendment packages. The team at Soilscape has helped us to improve our soil quality year after year, leading to quicker turnover times and healthier, happier, faster growing plants."
